Software Engineer / Fullstack Developer with over 2 years of experience in designing, building, and maintaining end-to-end web and mobile applications for enterprise systems. Proficient in JavaScript, TypeScript, PHP, Python (Django), Node.js, React.js, Next.js, and SQL databases. Skilled in developing scalable frontend architectures, building and integrating RESTful APIs, maintaining backend systems, and optimizing database performance.

Work Experience

PT Sinar Sakti Internasional – Jakarta, Indonesia.

Feb, 2025 – Present

Software Engineer

- Actively contribute to full-cycle development and maintenance of enterprise-scale application Puskeu Presisi 5.0 Polri across frontend and backend systems.
- Refactor backend architecture, fix critical bugs, and optimize Python/Django codebase to enhance overall system reliability and performance.
- Design and build RESTful APIs to seamlessly integrate core backend business logic with user interfaces.
- Architect and implement modern web interfaces for new projects using Next.js and TypeScript.
- Build a reusable internal UI component library and translate Figma designs into clean, maintainable, and efficient code.
- Analyze business flows and legacy architecture to support end-to-end system revamp initiatives.

Freelance - Remote

Frontend Developer

Mar, 2026 – Jul, 2026

- Built a web-based Estimator System for Citra Mandiri Negara (Printhink).
- Developed scalable and maintainable frontend architecture using Next.js.
- Utilized Ant Design for consistent UI/UX and Zustand for efficient state management.
- Enhanced application performance and usability through modern frontend best practices.
- Deployed frontend to VPS, configured Nginx, and implemented SSL/HTTPS for secure access.

Fullstack Developer

Sep, 2023 – Dec, 2024

- Developed a Decision Support System (DSS) to identify top-performing employees at PT Samcoa Farma.
- Implemented the Simple Additive Weighting methodology for calculate best employees in a web based application.
- Design and optimize relational database schemas to store assessment criteria, weights, and employee data in decision support systems
- Designed and built a web-based application integrating both frontend and backend functionalities

PT EDI Indonesia – Jakarta, Indonesia.

Nov, 2023 – Dec, 2024

Programmer

- Resolved system bugs, developed new feature modules, and maintained high uptime for the Ceisa 4.0 customs application.
- Developed complex UI components using React.js, Ant Design, Redux, and Context API.
- Refactored frontend codebase based on SonarQube static code analysis to improve security, quality, and maintainability.
- Collaborated closely with System Analysts and QA teams during User Acceptance Testing (UAT) and feature integration workflows.

Team Buddy Frontend Developer

- Assisted students throughout the bootcamp program, addressing any challenges they encountered during the training.
- Provided guidance and support to ensure students' success in their learning journey.
- Led students' teams in developing the front-end of their final project, offering clear direction.
- Helped students refine their front-end skills and achieve project goals by providing practical advice and solutions.

Education Level

Pamulang University – Tangerang, Indonesia.

2018 – 2023

Bachelor Degree of Informatics Engineering, 3,53/4.00

- Thesis: Implement Simple Additive Weighting Method for Decision Support System Web Based
- Relevant Course Work: Web Development, Database, Laravel, Bootstrap

Courses, Training and Certification

Codepolitan – Jakarta, Indonesia.

Dec, 2024 – Jan, 2024

Fundamental PHP & Laravel

- Relevant Course Work: PHP, Object Oriented Programming (OOP), Design Patterns, Laravel, MySQL, Object Relational Mapping (ORM), Mail Push Notifier

Harisenin.com – Jakarta, Indonesia
2023

May, 2023 – Sep,

Full-Stack Web Developer

- Final Project: Built car rental application
- Relevant Course Work: HTML, CSS, Javascript, React.js, Redux, Typescript, Node.js, Express.js and MYSQL

Cintessa Academy – Jakarta, Indonesia.

July, 2023 –Aug, 2023

Frontend Developer

- Final Project: Built job vacancy application
- Relevant Course Work: React.js and Redux

Dicoding – Jakarta, Indonesia.

Mar, 2023 – May, 2023

Fundamental Structured Query Language (SQL)

- Relevant Course Work: Database, MySQL and SQLite

Build Back-End Application for Beginner

- Final Project: Back-End application Bookshelf API that contains create, read, update and delete function
- Relevant Course Work: Node.js, Web Services and RESTful API

Skills

Programming Languages : JavaScript, TypeScript, Python, PHP, Go (Golang)

Frontend : HTML, CSS, Javascript, Typescript, Bootstrap, TailwindCSS, AntDesign, React.js, React Native (Mobile), Next.js, ApexChart.js

Backend : Node.js (Express), PHP (Laravel), Python (Django), Golang (Gin)

Database & Tools : MySQL, PostgreSQL, RESTful API, Git, GitHub, GitLab, Jira, SonarQube, Figma, Web Server (Nginx), VPS

Languages : English (Intermediate), Indonesia (Native)
